Salt Lake Combination Has a Mint in Red Cross Property.

MILL TO BE ERECTED AT ONCE

MINE IS LOCATED IN NEVADA COUNTY, CALIFORNIA.

THE Red Cross gold bonanza in Nevada county, California, will form the basis of a corporation capitalized for \$500,000 in \$1 shares that will file its articles tomorrow. The incorporators and officials of the new company are: Willard F. Snyder, president; Charles I. Rader, vice president; C. O. Ellingwood, secretary and treassurer, these, together with P. L. Kimberley of Sharon, Pa., and J. A. Brent of San Francisco, completing the board

As representatives of the Western Exploration company, Messrs. Kimber-ley, Snyder and Ellingwood joined Mr Rader, the manager of the famous Annie Laurie and Mr. Brent in the acquirement of the property for a stated consideration of \$150,000, and the formation of the Red Cross Gold Mining company by the parties named is the result. Frank Enzensperger, the well known expert, was retained as general manager of the company's mines, and he left for his field of labor yesterday

morning.

The new company's property is already well developed, and the latest report disclosed the fact that there was not less than 110,000 tons gold ore exposed in the ledge, which averages twelve feet wide. As the lowest samples taken from the mine carried \$10.60 and ran all the way from that figure up to \$400 per ton in the yellow metal, some idea of the magnitude of the proposition can be gained.

Yesterday arrangements were per-

Yesterday arrangements were per-fected for the erection of a combina-tion amalgamating and concentrating mill that will be built ust as quickly as the material can be gotten on to the ground, and while its initial capacity will not be so great, the management expects to have 100 stamps dropping by

expects to have low stamps dropping by this time next year.

The proposition is described by Mr. Snyder, who was recently on the ground, as about the cleanest-cut one into which he had looked for many a day, and he has no doubt that it will equal, if it does not surpass, the Annie Laurie bonanza of Gold Mountain.

Manager Enzensperger has been charged to spare no expense in blocking out the ore bodies, and by pounding the mill contractors on the back at every turn, it is hoped to have the proposition on a dividend-earning basis before the year closes.

UNCLE SAM ASSESSES.

Levy of 3c a Share Made Yesterday-Means New Mill.

The directors of the Uncle Sam Min

The directors of the Uncle Sam Mining company met yesterday afternoon and levied an assessment of 3c a share on its capital stock. According to the notice, it will become delinquent on the 25th of August, with sale day marked up for Sept. 11. This levy will bring into the treasury \$15,000, or about twice as much as is necessary to wipe out the company's indebtedness.

Exhaustive concentrating tests are now being made on the second-class ores by Professor J. M. Callow, and when they are completed he will submit plans for a forty or fifty-ton mill for their treatment. The plant, it is calculated, will be a simple and comparatively inexpensive one, and the management is confident that there will be no necessity to call for more than the one assessment.

The mine is now producing some good ore, and there is every prospect that no trouble will be experienced in making ends meet, at least, till the new will is started a couple of months or

making ends meet, at least, till the new mill is started, a couple of months or so later. With that in operation and the extraction of second-grade ores from the mine under way, the chances of breaking into new bodies of firstof oreaking into new bodies of inst-class ore will be greatly enhanced, and whether new strikes occur or not the company will have a sure source of revenue and substantial profit, in the handling of its milling rock. The out-look for Uncle Sam is bright and

FRANK KLEPETOKO'S PLANS.

Will Serve the Haggin-McCune Combine as Consulting Engineer Only. Concerning his withdrawl from the management of the Boston & Montana company's mines and the Anaconda smelter, as well as his connection with

smelter, as well as his connection with the Haggin-McCune properties in Peru, Frank Klepetko was quoted in Butte last Thursday as saying: "It is true that I have severed all connections with the old Boston & Montana company and the Anaconda smelter. My retirement is entirely vol. Montana company and the Anaconda smelter. My retirement is entirely vol-untary and has been contemplated for a long time. I expect to leave Montana as quickly as I can get my affairs straightened out. Probably by the first of August I shall go to New York and open an office as consulting engineer. I have a number of offers and have already contracted to act for J. B. Haggin, who owns copper properties in Cerro de Pasco, Peru. I shall make my home in New York and make frequent

trips to South America.
"A smelter will be built upon the Cerro de Pasco property, and I will be consulting engineer in its construction. It has long been my desire to retire from active work, and the opportunity to do so has presented itself."

CALIFORNIA AFFAIRS.

New Company Is Now in the Saddle and Work Is Being Pushed.

Though the complete rounding out of the directorate of the California Mining & Milling company has not yet been concluded, the new corporation has assumed control of the property where, according to advices from camp last night, twenty-two men are now employed, with Superintendent Gitsch buttling for the control of the co hustling for more. Yesterday, for the first time, the shares of the new cor-poration were called on 'change, and that no business was done in them was due to the fact, no doubt, that the talent was anxious first to fill its

"shorts" on the old stock.

The personnel of the new company's official family will likely be announced today, and Judge Snyder says if holders of the old stock ever expect to realize upon their shares they will necessarily have to exchange them for certificates. have to exchange them for certificates

COPPER-GOLD DISCOVERY.

Veteran Prospector of Provo Believes He Has a Bonanza.

(Special to The Herald.) Provo. July 23.—F. W. C. Hathen-brook, the veteran prospector who is connected with the Rhodes proposition in the Uintah Indian reservation, announces that he has discovered a large ledge of chromium and olivine rock, near his patented slate mines in Slate canyon, about a mile and a half east of Provo. The rock is heavily impreg-nated with gold, copper and polyxene metals, and as it increases in value

with depth and is more like a quarry than a mine, Mr. Hathenbruck feels confident he has struck a bonanza.

Ore and Bullion. Ore and bullion settlements in this city yesterday, as reported through McCornick & Co.'s bank, amounted to \$7,700, as follows: Silver, lead, gold and copper ores, \$58,199; base builion, \$14,690; gold bars, \$25,690.

Metal Market. Silver, 52% cents per ounce, Copper, 11% cents per pound; New York, 1.75@11.85 per 100 pounds; New York, Lead, \$3.50 per 100 pounds; New York,

MINING STOCK MARKET.

Several Stocks Scored Substantial

Advances Yesterday.

Another day of rather lively trading characterized the proceedings on 'change yesterday, and with exceptions, advances were scored in the ranks of the active participants. Daly-West was hardly as strong as on the day previous, and the same was true of Daly-Judge. Lower Mammoth was also weaker, but otherwise the market was buoyant. During the two regular and open board calls, 45,365 shares, with a selling value of \$5,177.35, changed hands, and this being a state holiday, an adjournment was taken until tomorrow. Carisa started the ball in the advancing column, and from 25% c sold up to \$2%. Consolidated Mercur moved up to \$2.65, while Century did business at 48c to 48c, with a buyer thirty being taken at 50c.

\$2.05, while Century did business at 48c to 49c, with a buyer thirty being taken at 50c.

California enjoyed the novelty of a double call, the shares of the new Nevada corporation being offered for the first time. None of the new issue sold, and the old shares commanded the higher figure, the filling by shorts accounting for the rise to 25½c.

Grand Central and Utah, on the strength of inspiring reports from the mines, were both in sharp demand, and each sold at advancing figures. The former touched \$5,' a rise of 20c since Tuesday, and the latter commanded 50c at the close.

close.
Eagle & Blue Bell was strong at \$1.17\%, Ingot was ditto at \$5\% to 7c, while the balance of the active list did business at close to Tuesday's figures.
The day closed on the following list of final quotations and sales: Forenoon. | Afternoon.

Mining Notes.

Fred Nightengale, assistant secretary of large supply. Mining Notes.

today.

Silver dropped back a quarter of a cent yesterday to 52% cents.

The Regulator, of Alta, is in the market with a car of high grade ore.

Manager Milan Packard of the Star Consolidated spent yesaterday in the city. This being Pioneer day, there will be no sessions of the mining stock exchange.

The Grand Central reached the market with two cars of high grade ore yesterday.

The Tonopah Gold Mining company hit he market with four carloads of rick gold-silver ore yesterday. Five cars of ore from the South Swan-sea and three from the Eagle & Blue Bell were released from the samplers yester-day.

day.

The Taylor & Brunton sampler was yesterday in receipt of ten cars of ore from Tintic, four from Tonopah, one from Alta and one from Montana.

N. J. Dooley is packing his grip for a week or ten days' trip into Stateline and Pike's Diggings. He will leave either tonight or tomorow night.

James W. Nelli and George H. Robinson left for Butte last night. Mr. Neili goes to start the ball rolling on his \$5,00,000 option on the Annie Laurie.

Samuel Newhouse, the millionalre min-

Samuel Newhouse, the millionaire mining operator, sailed from New York for London yesterday. He expects to return and come on to Utah again about the 1st of September.

S. G. Weston, the veteran Nevada mining operator, of Elko, is in the city for a short business trip. He is the owner of the Baltimore property, in Elko county, which is considered the biggest proposition of its kind in the state.

Judge Morris Sommer returned from Provo canyon yesterday with fish bones standing out upon him like "quills upon the fretful porcupine." He reports having had a delightful outing, and says he is now prepared to turn a few more tricks in the mining business.

Fred Raabe, foreman at the Silver Bell,

now prepared to turn a few more tricks in the mining business.

Fred Raabe, foreman at the Silver Bell, in Park City, came down from camp last night, bringing with him samples of fine looking ore from the new workings. Every day's work in the property adds to the showing being made, and there is hardly a shadow of doubt that a big shipper will be made of the property before the year closes.

Manager H. C. Brownlee of the St. Louis-Ontario and East Ontario properties, Park City, is down from camp for a short breathing spell and visit with his family. He says good progress is being made in the new shaft in the St. Louis-Ontario, where the ledge matter in the bottom is beginning to look mighty suspicious. He will return to camp tomorrow.

Arrivals from Stateline bring the information that a new start was made at the Ophir property Monday morning under Superintendent Parker, and in a short time, it is expected, the mill will go into cammission again. Lumber and machinery for the Johnny's new mill are beginning to arrive, and the greatest confidence is expressed that the plant will be finished on schedule time.

QUIET DAY IN WALL STREET

A Few Stocks Showed Strength, But Sales Were Light.

LONDON CONTINUES TO SELL

MORE GOLD SHIPPED TO FOR-EIGN MARKETS YESTERDAY.

New York, July 23.—The stock market again demonstrated its absorptive power today and made a various but quite convincing show of strength, notwithstanding the appearance of a reactionary tendency in some of the stocks which tempted to realizing by the high price attained, and a few cases of positive weakness.

The volume of dealings was again below 1,000,000 shares and the bulk of the dealings was congested in a very few active stocks. It was obvious, nevertheless, that the bull campaign was still in force and that large and powerful capitalists were still committed to the long side of the market.

Not much attention was paid to the news of the day, which was somewhat weak in its bearing upon values of securities. The speculation shifted from one to another quarter of the market in the usual progress of rotation, in which skillful speculative leaders keep the movement of prices equalized from time to time and without regard to new developments.

The weekly cron bulletin of the weather

time and without regard to new developments.

The weekly crop bulletin of the weather bureau was interpreted favorably on the whole, especially that of corn, and turned the scale of sentiment in favor of the advance. Some disappointment was felt over denlals of yesterday's rumors that anthracite mining would be resumed on Aug. 1, and the coalers and eastern/railroads generally, with the exception of an early advance in New York Central, were almost stationary. A feature of the day was the marking up of various dormant stocks which have not shared in the recent advance. This tendency extended to Northern Securities company on the curb, which rose buoyantly to 10.

Great Northern preferred advance 4½, but lost half of it. These movements were simultaneous with the publication of an abstract of the indenture securing the new Oregon Short Line collateral bond.

This showed that provision is made for

of an abstract of the indenture securing the new Oregon Short Line collateral bond.

This showed that provision is made for allowing that the Northern Securities stock deposited as collateral for these bonds shall be allowed to share in any reorganization project or further union or merger or sale and distribution of the company's assets.

The profit-taking in Pennsylvania was somewhat aggravated by the action of the New York aldermen in rejecting the Pennsylvania tunnel contract. Brooklyn Transit was decidedly weak, owing to the belief that the company's bid for construction of the East river tunnel will fail of acceptance.

The granting of a stay of the Amalgamated company's injunction against the workings of a disputed mine by a rival was held to explain the reactionary tendency in that stock. There was striking upward movements in various specialities, which were due to purely individual causes or manipulation. The expectation that yesterday's engagement of gold for export would be canceled was only partly realized and there was a further engagement by another firm of \$1,000,000, thus bringing the exports for the week up to \$2,750,000.

\$2,750,000.

The sustained steadiness of the exchange market indicated that the shipment is in direct settlement of foreign obligations. London continued to sell stocks in this market. The call money market was somewhat firmer and the time money market distinctly so, but this did not seem to disturb the equanimity of the buyers of stocks. Active profittaking made the closing irregular and the net changes mixed.

The bond market was irregular. Total sales, par value, \$4,55,000.

KROGER BEHIND THE BARS.

Man Charged With Robbing German Postoffice in Germany.

San Francisco, July 23.—United States Marshal Shine, accompanied by local representatives of the Pinkerton detective agency, arrested Arnold Kroger, altas Frank Miller, at 47 Erie street, on a charge of absconding and embezzing 36,000 marks from the postoffice of Erensost, Friesland, Germany.

Kroger was the postmaster of that place until Feb. 8 last, when, it is claimed, he disappeared with the money that had been placed in his care. Kroger, although taken by surprise, showed fight. He drew a revolver, and but for the Interference of the Pinkerton men, would have shot the officer. Kroger will be extradited as soon as possible and taken to Germany, where he will be placed on trial for official malfeasance.

Government bonds easier; state bonds steady; railroad bonds irregular.

THE GRAIN MARKETS. Conditions Were Bullish, But Heavy

Offerings Kept Prices Down.

Chicago. July 23.—Wheat ruled about steady. The opening was a little higher on cables and the weather, which was a little showery, and it was expected to be rainy tomorrow. The government report also indicated damage to wheat.

Commission houses, however, had stuff for sale. The outsider was keeping out of the market because of fears of manipulation, and receipts were very good.

The main bullish incentives which brought a late raily after an early dip were the depleted stocks, the very poor grading of the receipts and local thunderstorms. The prospects for export business were somewhat improved but the cash demand was only fair. There was renewal of the gossip that a leading packer was trying to boost September prices. Under these influences July wheat practically stood still at 77. September opened unchanged to ½c up at 25% to 72% dipped to 72% railled to 72% and closed firm, ½c up, at 72%.

Corn was slow and but little interest was taken in the market. September closed ½c down at 61½65%.

Oats were dull. September closed ½c up at 35%.

Provisions reacted a little from yesterday's severe slump, but only a little of the gain held. September pork closed 5c up, lard 5c higher and ribs 7½c up.

Wheat—No. 2: Offerings Kept Prices Down.
